SDI06KB PREPREG

(UL ANSI: FR-15.1) Low CTE & Low Loss & Low Dk Halogen-free Material for HDI PCB

HOT PRESSING CYCLE

- Heat up rate: 1.5-3.0°C/min (80-140°C).
- Curing time: >80min (>200°C).
- Full pressure timing: product temperature 90-115°C.
- The hot pressing parameter is for your reference only, please turn to Shengyi Technology Co., Ltd for detailed information.

STORAGE CONDITION

- 3 months when stored at < 23°C and <50% RH.
- 6 months when stored at <5°C. Normalize in room temperature for at least 4h before using.
- Beware of moisture, always keep wrapped in damp-proof material. Were kept in normal condition, prepreg might absorb moisture and its bonding strength would be weakened.
